

F-Secure Mobile Security™ 5.1 for S60 3rd & 5th edition

Release notes

Protection for your most personal computer

F-Secure Mobile Security allows smartphone users to experience the full potential of their devices without the fear of mobile threats. In the unfortunate event your phone is lost, stolen, infected by mobile malware or even spied on, Mobile Security helps to safeguard your personal and confidential data.

F-Secure Mobile Security protects you against:

- ✓ Misuse of confidential information in case the phone is lost or stolen
- ✓ Mobile spyware monitoring your phone usage
- ✓ Unwanted billing caused by viruses trying to spread
- ✓ The device becoming unusable due to malware

Technical savvy is not required when installing or running F-Secure Mobile Security. The solution works invisibly in the background, scanning all network traffic and monitoring the device for malware. The application combines real-time antivirus functionality with a firewall, anti-theft and anti-spyware, making the smartphone completely safe for today's connected life.

F-Secure Mobile Security

- ✓ Complete, automatically updated security solution for smartphones
- ✓ Safeguards your personal and confidential data
- ✓ Protects against mobile malware
- ✓ Easy to install and smooth to use

Key features

- ✓ **Antitheft**
If your phone is lost or stolen, F-Secure Mobile Security helps to safeguard your personal and confidential data. The Antitheft offers three new features to keep your data safe: remote locking, remote wiping and theft control.
- ✓ **Antispyware**
Protects against spyware and espionage software that may monitor and

2(5)

record all the actions on a mobile phone, including voice calls, SMS, multimedia and e-mail messages.

✓ **Antivirus and customizable Firewall**

Combined real-time antivirus protection with a customizable firewall makes the device completely safe against mobile viruses and malware.

✓ **Smooth user experience**

Security has never looked better. The new smooth user interface is all about making security easy.

✓ **Unique advanced automatic updates**

A unique 2-layer update mechanism automatically retrieves the newest updates whenever any data connection is used. Advanced SMS updates ensure that you receive the critical updates even when a data connection is not available.

Installation and system requirements

F-Secure Mobile Security™ 5.1 for S60 3rd and 5th edition client application supports devices running on top of Symbian 9.1, 9.2, 9.3, and 9.4 versions. The installation of the client application requires about 1 Mb of free disc space. The activation and updates require a working internet connection. Note! MMS access point does not work for updates.

Supported devices

F-Secure Mobile Security™ 5.1 for S60 3rd and 5th edition client application supports devices running on top of Symbian 9.1, 9.2, 9.3, and 9.4 versions. The list of supported devices is maintained at <http://mobile.f-secure.com/devices/index.html>.

Language support

F-Secure Mobile Security™ supports 27 languages. The language is selected based on the device language. In case the device language is not supported, user is shown the list of supported languages. The full list of supported languages is available at <http://mobile.f-secure.com/devices/index.html>.

New features introduced in this release

- ✓ Own locking functionality, which supports
 - Lock configuration through client application settings
 - Short lock code for improved usability (5 characters)
 - Instant lock through client application menu
 - Possibility to receive calls while locked
 - Possibility to make emergency calls while locked
 - Possibility to view calendar reminders
 - Extended timeout if wrong lock code inserted five times
- ✓ Report SIM change to user defined number (new theft control feature)
- ✓ Remote wipe for memory card and internal drives (new remote wipe feature)
- ✓ Send FSMS download link to a friend using SMS
- ✓ Solve functionality for easier problem solving e.g. in case the client application is reminding about old updates
- ✓ Learn more with the possibility to access F-Secure's web content e.g. weblog (news from the antivirus lab)
- ✓ Monthly statistics shown to the user
- ✓ Link to settings to all feature views
- ✓ Improved support for S60 5th edition (touch screen) devices

Known issues

- Software update is not successful through WAP access point of some operators because size of download through HTTPS has upper limit, which is lower than size of software update package.
- E90 when FSMS detects and quarantines "curse of silence SMS" then SMS's are not working anymore if SMS is not deleted.
- N76 cleaning from "curse of silence SMS" needs booting of the device
- N73 "curse of silence SMS" cannot be deleted by FSMS, however this device is not affected by that SMS.
- Blocked total and Blocked today counts in Firewall status may show briefly different counts although all blocked connections would have occurred

4(5)

"today". This happens because the blocked total count and the blocked today count are stored in different locations.

- Scanned today count will show that some files has been scanned after the restart of FSMS even if the scanning mode was manual. This is due to the fact that the client application scans our own files at start-up even if the scanning was disabled.
- Anti-theft lock in not turned ON if lock SMS comes during the call. The locking is done after the call.
- Browser's WLAN search doesn't always work with FSMS.
- FSMS uninstallation fails if help is opened into background.

Information about the use of the application

Information about the use of the application is available in the User Guide (eng only). User guide and quick guide <http://mobile.f-secure.com/manuals/index.html>.

F-Secure Corporate Profile

F-Secure Corporation protects consumers and businesses against computer viruses and other online threats from the Internet and mobile networks. We want to be the most reliable provider of internet security services in the market. One way to demonstrate this is the [speed of our response](#).

F-Secure's [award-winning solutions](#) for real-time virus protection are available as a service subscription through more than 170 Internet service providers and mobile operator partners around the world, making F-Secure the global leader in the market of internet and computer security. The solutions are also available as licensed products through thousands of resellers globally.

F-Secure aspires to be the most reliable mobile and computer security provider, helping make computer and smartphone users' networked lives safe and easy. This is substantiated by the company's independently proven ability to respond faster to new threats than its main competitors. Founded in 1988 and headquartered in Finland, F-Secure has been listed on the OMX Nordic Exchange Helsinki since 1999. The company has consistently been one of the fastest growing publicly listed companies in the industry. The latest news on real-time virus threat scenarios is available at the

[F-Secure Data Security Lab weblog](#).
